

California OES Weather Threat Briefing

Sunday, June 7, 2020
9:00 AM PDT

- **Day 1 (Sunday):** Critical fire weather conditions are expected today across interior portions of Southern California due to gusty winds and low relative humidity. These fire weather concerns will spread into more coastal portions of Southern Region tonight into Monday as a Santa Ana wind event begins.

WEATHER KEY POINTS

06/07/20 - 06/13/20

Sunday

- Gusty winds will continue today, with the strongest winds across interior portions of Southern Region
 - Combined with dry conditions, these winds will create critical fire weather conditions
- Scattered showers and thunderstorms will continue across northern CA today
 - Gusty winds, small hail, and brief heavy rain are possible with some thunderstorms
 - Slippery roads and minor slush accumulation is possible on the higher passes of the Coastal and Inland Regions

Monday-Thursday

- Gusty winds will continue Sunday night into Monday across portions of Southern Region, as a Santa Ana wind event develops across the area; these winds will likely decrease a bit Tuesday, but remain breezy
 - These gusty winds, combined with dry relative humidities, will also create critical fire weather concerns
 - The strongest of these winds, Sunday night through Monday morning, could cause damage to trees and power lines, with power outages expected; travel will be difficult for high profile vehicles
- Drier weather is expected for the most of the work week, with a warming trend through at least midweek
 - Low to moderate heat impacts could return to coastal portions of Southern Region as early as Monday and Tuesday, becoming more widespread Wednesday and Thursday

Friday-Saturday

- The weather will likely trend wetter and cooler for Friday into next weekend, though details are relatively low confidence at the moment
